#### Events Director –

- Update on recent events/thank students for attending
- Code Event
  - Special s/o to Tyler for helping CNSA run the event and providing a lot of information to students! Also to Steph for providing resources like the checklists that were given to students.
  - We had a great turnout for the Code Event that took place on Friday September 16th in the NRC. I hope all attendees enjoyed the event and got some useful information and skills they can later apply. During the simulations of the actual Code Blue we did have a few issues like not having a compression dummy and having a “family” member (Blake) try to step into the situation. Despite these, students did really well especially for not having seen a demo prior to the simulation
  - We appreciated everyone's feedback and for our next Code Event, we hope to use the sim lab (pending approval and coordination with Kathy) and having more structure. We will also provide a demo before so that way you guys can have somewhat of an idea of what you will be doing during a Code, which we all think will help out a lot during the simulation if you see us doing it first.
- Spanish Medical Interpreting
  - Thank you to Lesly, Jorge, and Joel for helping facilitate this event. I really appreciate you guys for stepping up!
  - We had a good amount of students show up and they were all really engaging with us. I hope you guys learned something and like we mentioned it doesn't matter if your pronunciation of words is perfect, the effort you put into trying your best to communicate with your patient speaks for itself. I also hope you guys found the charts easy to follow and you can find them on the CNSA Canvas Page under the “Events” module.
  - For those who couldn't attend, we are planning to have another Spanish Medical Interpreting Event sometime soon maybe in November where we hope to go through more terms and introduce possible responses you may get from patients. As much as it's important to know how to communicate what you are doing, it's important to know what your patient is telling you, so be on the lookout for that.

■ **Please have so second sems**
